Asheron Management Consultancies, LLC — Website Build Specification

Client: Asheron Management Consultancies, LLC (Dubai, UAE)
Document type: Developer handover / build specification
Version: 1.0
Date: 14 August 2026
Prepared for: Website design and development team

1. Project Summary

Build a premium, fast, responsive corporate website for Asheron Management Consultancies, LLC — a Dubai-based advisory firm delivering four licensed practices: AI & Innovation, Strategy & Management, People & Capability, and Project Development.

Primary objective: generate qualified consultation enquiries from UAE-based decision makers (boards, C-suite, heads of compliance/risk/operations, government and semi-government entities, regulated financial institutions).

Secondary objectives

- Establish institutional credibility and licensed legitimacy.
- Communicate four distinct practices without diluting the brand.
- Support search visibility for UAE advisory and AI-governance search terms.
- Provide a maintainable Insights section for regulatory and AI-governance commentary.

Brand rule: the site refers to **Asheron** only. Do not reference MAVYN LLC anywhere in copy, metadata, footers, or code comments.

Non-negotiables

- No guarantees of regulatory approval, licensing outcomes, or compliance status.
- No client names, logos, case outcomes, or regulator interactions.
- No stock-photo clichés (handshakes, gavels, jigsaw pieces, chess pieces, generic boardroom laughter).

2. Audience and Tone

Audiences

1. Regulated financial institutions (banks, finance companies, exchange houses, insurers, fintechs, virtual-asset firms).

2. Government, semi-government, and large private-sector organisations pursuing transformation or AI adoption.
3. Corporates and family groups needing strategy, PMO, and capability support.

Tone of voice

- Confident, discreet, precise, executive-level.
- Short declarative sentences. Active voice.
- British English spelling throughout (organisation, prioritise, programme, licence as noun).
- No hype vocabulary: avoid "revolutionary", "cutting-edge", "game-changing", "unlock", "supercharge", "seamless", "world-class".
- Never imply autonomous decision-making without human accountability.

3. Site Map

```
/                          Home
/about                     About Asheron
/services                  What We Do (practice overview hub)
/services/ai-innovation    AI & Innovation
/services/strategy         Strategy & Management
/services/people           People & Capability
/services/projects         Project Development
/industries                Industries We Serve

/insights                  Insights (index)
/insights/[slug]           Insight article template
/contact                   Contact / Request a Consultation
/privacy                   Privacy Notice
/terms                     Terms of Use
/cookies                   Cookie Notice
/sitemap.xml  /robots.txt  Generated
404, 500                   Error pages
```

Phase 1 launch scope: Home, About, Services hub, 4 practice pages, Industries, Insights index + article template, Contact, Privacy, Terms, Cookies, error pages.

Global navigation (desktop)

`Asheron [logo] | About | What We Do ▾ | Industries | Insights | Contact | [Request a Consultation]`

The "What We Do" dropdown lists the four practices with a one-line descriptor each, plus a link to "View all services".

Mobile navigation: full-screen overlay menu, accordion for What We Do, persistent "Request a Consultation" button at the bottom of the overlay.

Footer (4 columns + legal bar)

- Col 1: Asheron logo, one-line positioning statement, Dubai, United Arab Emirates.

- Col 2: Practices (4 links).
- Col 3: Company — About, Industries, Insights, Contact.
- Col 4: Contact — email, phone, LinkedIn icon link.
- Legal bar: `© [current year] Asheron Management Consultancies, LLC. All rights reserved.` + Privacy Notice · Cookie Notice · Terms of Use. Licence numbers displayed as a single line: `Licensed activities: 7020039 · 7020003 · 7020008 · 7020020`.

4. Page-by-Page Copy

All copy below is final-draft and approved for build. Placeholders in `[SQUARE BRACKETS]` must be supplied by the client before launch — do not invent values.

4.1 Home — `/`

Meta title: Asheron | Strategy, AI Governance & Advisory Consultancy in Dubai
Meta description: Asheron is a Dubai-based consultancy delivering AI and innovation, strategy and management, people and capability, and project development advisory for UAE organisations.

Hero

- H1: From strategy to implementation — built for the UAE, designed to endure.
- Sub: Asheron helps organisations turn strategic, regulatory, and technology priorities into governed, measurable outcomes.
- Primary CTA: Request a Consultation → `/contact`
- Secondary CTA: Explore Our Practices → `/services`
- Visual: abstract data/structure visual or restrained architectural Dubai imagery with a dark navy overlay. No people-focused stock photography in the hero.

Credibility strip (directly beneath hero, single row, muted background)
`Dubai, United Arab Emirates · Four licensed advisory practices · Regulated-sector experience · Practical, regulator-ready delivery`

Section — Positioning

- H2: Advisory that survives contact with reality.
- Body: Strategy documents, technology pilots, and training programmes often stall at the point of execution. Asheron works at that point. We combine strategic design with governance, capability, and delivery discipline so that decisions taken at board level become operational practice — with clear ownership, controls, and evidence.

Section — What We Do (4 cards)

- H2: Four practices, matched to our four licences.
- Intro: Engage each practice independently — or combine them in sequence to move from strategic intent to sustainable operational delivery.

Card	Title	Licence	Card copy	Link
1	AI & Innovation	7020039	AI opportunity discovery, readiness diagnostics, responsible AI governance, workflow design, model and vendor assessment, and implementation assurance.	`/services/ai-innovation`
2	Strategy & Management	7020003	Operating-model design, strategic planning, process re-engineering, transformation roadmaps, KPI architecture, governance enhancement, and board advisory.	`/services/strategy`
3	People & Capability	7020008	Workforce impact assessment, organisation design, capability frameworks, AI fluency programmes, leadership development, and change management.	`/services/people`
4	Project Development	7020020	Business cases, PMO design, programme mobilisation, stage-gate governance, vendor selection, project assurance, and programme recovery.	`/services/projects`

Card behaviour: equal-height cards, 2×2 grid on desktop, single column on mobile. Licence number rendered as a small uppercase label above the title. Entire card is clickable; hover raises elevation and shifts the accent rule.

Section — Our Approach (5 steps, horizontal on desktop, vertical timeline on mobile)

- H2: How we work.

1. **Assess** — Understand how work is actually performed, where value and risk sit, and what the operating environment allows.
2. **Prioritise** — Rank opportunities by strategic value, feasibility, control requirements, and expected benefit.
3. **Design** — Define the target operating model, governance, controls, and roles required to deliver it.
4. **Enable** — Equip leadership and teams with the skills, guidance, and playbooks to run the new way of working.
5. **Assure** — Support controlled rollout, validate safeguards, monitor outcomes, and refine.

Section — Why Asheron (3 columns)

- H2: Why organisations engage us.

1. **Deep UAE market experience** — Advisory grounded in how UAE organisations, regulators, and markets actually operate, not imported templates.
2. **Governance-first innovation** — Technology and transformation delivered with accountable ownership, documented controls, and auditable evidence.
3. **Delivery discipline** — We stay through implementation, where most initiatives fail, and measure the result.

Section — Industries teaser

- H2: Sectors we serve.
- Logos not used. Render as a tag grid of sector names linking to `/industries`: Banking & Finance · Insurance · Fintech & Virtual Assets · Government & Public Sector · Professional Services · Real Estate & Family Groups · Trade & Logistics · Healthcare & Education.

Section — Insights teaser

- H2: Insights.
- Sub: Practical commentary on governance, AI adoption, and delivery in the UAE.
- Show 3 most recent posts (image, category, title, date, 2-line excerpt). CTA: View all insights.

Closing CTA band (full-width, dark navy)

- H2: Let's discuss what you are trying to deliver.
- Sub: A short, confidential conversation is usually enough to establish whether we are the right fit.
- Button: Request a Consultation

4.2 About — `/about`

Meta title: About Asheron | Dubai-Based Advisory Consultancy
Meta description: Asheron Management Consultancies is a Dubai-based advisory firm combining strategy, AI governance, capability building, and project delivery for UAE organisations.

- H1: A Dubai consultancy built around execution.
- Intro: Asheron Management Consultancies, LLC is an advisory firm based in Dubai, United Arab Emirates. We work with boards, executive teams, and functional leaders on the problems that sit between intent and delivery: unclear operating models, unmanaged technology risk, capability gaps, and programmes that stall after approval.

H2: What we believe

- Advice is only valuable if it can be implemented within the client's real constraints.
- Innovation and control are not opposites; the strongest organisations design both at once.
- Capability must transfer to the client team, not remain with the adviser.
- Independence and discretion are conditions of the work, not features of it.

H2: How we are different

- **Locally grounded.** Our recommendations reflect UAE regulatory expectations, market conditions, workforce realities, and national priorities.
- **Multi-disciplinary by design.** Strategy, technology governance, capability, and delivery are handled by one integrated practice rather than four disconnected vendors.
- **Proportionate.** We size governance and process to the organisation in front of us — not to a global template.

- **Accountable.** Every engagement defines owners, decision rights, milestones, and evidence.

H2: Leadership
Client to supply: `[LEADERSHIP NAME]`, `[TITLE]`, `[150–200 WORD BIOGRAPHY]`, `[PROFESSIONAL PHOTOGRAPH]`, `[LINKEDIN URL]`. Developers: build a reusable leadership card component supporting 1–4 profiles; render nothing if no profile is populated.

H2: Licensed activities
Asheron operates under the following licensed activities in the United Arab Emirates:

Practice	Licence
AI & Innovation	7020039
Strategy & Management	7020003
People & Capability	7020008
Project Development	7020020

Trade licence number: `[TRADE LICENCE NUMBER]`. Registered address: `[REGISTERED ADDRESS]`.

CTA: Request a Consultation.

4.3 What We Do — `/services`

Meta title: Our Services | Strategy, AI, Capability & Project Advisory | Asheron
Meta description: Four licensed advisory practices: AI and innovation, strategy and management, people and capability, and project development — delivered for UAE organisations.

- H1: What we do.
- Sub: Four practices, matched to our four licences. Asheron brings strategy, delivery, capability, and responsible innovation together — helping organisations turn priorities into controlled, measurable outcomes.

Render the four practices as full-width alternating rows (image/abstract visual left or right), each containing: licence label, practice title, 2-sentence summary, 6-item service bullet list, and a "Explore this practice" link.

Closing line: Engage each practice independently — or combine them in sequence to move from strategic intent to sustainable operational delivery.

4.4 AI & Innovation — `/services/ai-innovation`

Meta title: AI Consulting & AI Governance in the UAE | Asheron
Meta description: AI readiness assessment, responsible AI governance, use-case prioritisation, vendor and model evaluation, workflow design, and implementation assurance for UAE organisations.

- Licence label: Licence 7020039
- H1: AI that works within your controls.

- Lead: AI adoption should create measurable value without weakening governance, confidentiality, regulatory compliance, or accountability. Asheron helps organisations move from isolated experimentation to practical, controlled, and scalable AI-enabled ways of working.
- Second paragraph: We begin by understanding how work is actually performed, where manual effort and decision bottlenecks sit, and which use cases are viable within your risk appetite. We then help establish the governance, operating model, training, and implementation controls needed to deploy AI responsibly.

H2: Core services (8 cards, 2 columns desktop)

Service	Description
AI Strategy & Readiness	Assess business readiness, priority use cases, data availability, operating risks, and the foundations required for responsible adoption.
AI Use-Case Discovery	Identify and prioritise high-value use cases across compliance, risk, operations, customer due diligence, reporting, and management information.
AI Governance & Assurance	Develop proportionate policies, oversight structures, risk assessments, approval standards, human-review controls, and monitoring requirements.
Generative AI Enablement	Help teams use generative AI productively and safely for research, drafting, analysis, knowledge retrieval, and workflow support.
AI Vendor & Model Assessment	Evaluate AI vendors, models, data-processing practices, security architecture, contractual protections, and implementation risks.
AI Workflow Design	Redesign selected processes and define agent-assisted or automated workflows, controls, escalation routes, audit trails, and performance measures.
AI Training & Capability	Deliver role-specific training, responsible-use guidance, practical playbooks, and leadership workshops to embed secure AI adoption.
Implementation Oversight	Provide independent assurance across AI implementation, testing, control design, operational readiness, and post-launch monitoring.

H2: Our approach

1. **Assess** — Review AI maturity, current tools, data environment, processes, risks, and business objectives.
2. **Prioritise** — Build an opportunity register that ranks use cases by strategic value, feasibility, control requirements, implementation effort, and expected benefit.
3. **Govern** — Define accountable ownership, AI policy, data-handling rules, vendor due diligence, human oversight, testing standards, and monitoring arrangements.
4. **Enable** — Equip leadership and teams with role-specific guidance, practical use cases, approved prompts, and clear escalation procedures.
5. **Implement and assure** — Support controlled rollout, validate safeguards, monitor outcomes, and refine workflows as adoption matures.

H2: Where AI delivers early value

- AI-assisted policy, procedure, and regulatory-change drafting with mandatory human review.
- KYC and customer due diligence file preparation, document summarisation, and quality assurance support.
- Compliance issue and action-tracker consolidation.
- Regulatory reporting preparation and management-information generation.
- Internal knowledge assistants built on approved policies, procedures, and guidance.
- Risk assessment support, control mapping, and evidence-pack preparation.
- Role-specific training content for first-line and control functions.
- Vendor due diligence and AI third-party risk evaluation.

Pull quote (styled block): From AI experimentation to governed, scalable capability.

Required disclaimer (small text, end of page): Asheron provides advisory services only. We do not guarantee regulatory approval, compliance outcomes, or the performance of third-party AI systems. All AI-assisted outputs are designed to remain subject to human review and client accountability.

4.5 Strategy & Management — `/services/strategy`

Meta title: Strategy & Management Consulting in Dubai, UAE | Asheron
Meta description: Operating-model design, strategic planning, governance enhancement, process re-engineering, KPI frameworks, feasibility studies, and board advisory in the UAE.

- Licence label: Licence 7020003
- H1: Strategy that can be executed.
- Lead: Asheron supports boards, executive teams, and business leaders in translating growth, transformation, regulatory, and operational priorities into a clear operating model and a deliverable roadmap.

H2: Core services

- Corporate, business-unit, and functional strategy.
- Operating-model assessment and target operating-model design.
- Governance structures, decision rights, committees, and management forums.
- Process mapping, simplification, re-engineering, and control optimisation.
- Transformation strategies and prioritised implementation roadmaps.
- KPI, KRI, management-information, and performance-management frameworks.
- Business planning, feasibility studies, and investment cases.
- Board and executive advisory on strategic risk, performance, and delivery.

H2: UAE focus
Support is tailored to UAE conditions: growth and diversification initiatives, digital

transformation, regulated-business requirements, public and private sector operating models, and market-entry or expansion priorities across the Emirates and wider GCC.

4.6 People & Capability — `/services/people`

Meta title: People & Capability Consulting UAE | Organisation Design & AI Fluency | Asheron
Meta description: Organisation design, workforce assessment, capability frameworks, AI fluency programmes, leadership development, change management, and Emiratisation-aligned capability building.

- Licence label: Licence 7020008
- H1: Capability that makes change stick.
- Lead: Technology and strategy deliver results only when people understand their roles, hold the right skills, and are supported through change. Asheron designs practical workforce and capability interventions aligned to the operating model and business objectives.

H2: Core services

- Organisation design, role clarity, and accountability mapping.
- Workforce assessments and future-skills planning.
- Capability frameworks for leadership, operations, compliance, risk, and AI-enabled work.
- Role-based AI fluency, responsible-use, and practical adoption programmes.
- Learning pathways, training curricula, workshops, and playbooks.
- Change-impact assessments, stakeholder engagement, and communications planning.
- Performance and competency frameworks.
- Emiratisation-aligned capability strategies, development pathways, and knowledge-transfer plans.

H2: UAE focus
Programmes are designed to support national-talent development goals while ensuring that critical knowledge, capability, and succession planning are embedded within the business rather than retained by external providers.

4.7 Project Development — `/services/projects`

Meta title: Project Development, PMO & Programme Assurance UAE | Asheron
Meta description: Business cases, feasibility studies, PMO establishment, stage-gate governance, vendor selection, project assurance, and recovery of underperforming programmes in the UAE.

- Licence label: Licence 7020020
- H1: Projects built for delivery — not presentation.
- Lead: Asheron helps clients move from an initial concept or business case to a governed, investable, and deliverable programme, providing independent structure and challenge

across the project lifecycle.

H2: Core services

- Opportunity assessments, feasibility studies, and business cases.
- Project charters, scope definition, requirements, and benefits-realisation plans.
- PMO establishment, project governance, and reporting structures.
- Programme planning, mobilisation, delivery roadmaps, and dependency management.
- Stage-gate design, steering-committee support, and executive reporting.
- Vendor selection, evaluation criteria, due diligence, and implementation oversight.
- Independent project assurance, risk reviews, and delivery health checks.
- Recovery planning for delayed, complex, or underperforming programmes.
- Post-implementation reviews, lessons learned, and benefits tracking.

H2: UAE focus
Suited to transformation initiatives, digital and AI programmes, regulated-business change, capability-building programmes, operational improvement, and strategic growth projects across the UAE.

4.8 Industries — `/industries`

Meta title: Industries We Serve | Asheron Advisory, Dubai
Meta description: Asheron advises banks, finance companies, insurers, fintech and virtual-asset firms, government entities, professional services, and family groups across the UAE.

- H1: Industries we serve.
- Sub: Our work concentrates on organisations where governance, regulation, and delivery pressure meet.

Eight sector cards, each with a heading and 2–3 lines of copy:

1. **Banking & Finance** — Banks, finance companies, and exchange houses addressing governance, operating-model, control, and transformation priorities.
2. **Insurance** — Insurers and intermediaries strengthening governance, controls, capability, and operational efficiency.
3. **Fintech & Virtual Assets** — Fast-scaling regulated businesses building proportionate governance and control frameworks without slowing growth.
4. **Government & Public Sector** — Entities delivering national and emirate-level priorities, digital initiatives, and capability programmes.
5. **Professional Services** — Firms with regulatory obligations that need practical frameworks, training, and delivery structure.
6. **Real Estate & Family Groups** — Groups formalising governance, decision rights, and programme delivery as they institutionalise.

7. **Trade, Logistics & Commodities** — Businesses managing regulatory exposure, counterparty risk, and operational complexity.
8. **Healthcare & Education** — Institutions balancing growth, workforce capability, and governance obligations.

CTA band: Not sure where your organisation fits? Start with a conversation. → Request a Consultation.

4.9 Insights — `/insights` and `/insights/[slug]`

Meta title: Insights | Governance, AI & Delivery Commentary | Asheron
Meta description: Practical commentary from Asheron on governance, AI adoption, regulatory change, capability building, and programme delivery in the UAE.

- H1: Insights.
- Sub: Practical commentary on governance, AI adoption, capability, and delivery in the UAE.

Index requirements: card grid (3 across desktop, 1 mobile), category filter chips (Categories: AI & Governance, Strategy, People & Capability, Project Delivery, Regulatory Update), pagination or load-more at 9 items, newest first.

Article template requirements: H1 title, category chip, publish date, estimated read time, author name, hero image, article body supporting H2/H3, bullet and numbered lists, blockquote, table, image with caption, callout box, and an internal-link component. Sticky share row (LinkedIn, copy link, email). Related-insights block (3 items) and a closing consultation CTA. Author byline block reusing the leadership card component.

Empty-state copy (before first article is published): Our first insights will be published shortly. In the meantime, please get in touch to discuss your priorities.

Client to supply: first 3 articles at launch. Do not publish placeholder or AI-generated article text.

4.10 Contact — `/contact`

Meta title: Contact Asheron | Request a Consultation | Dubai, UAE
Meta description: Request a confidential consultation with Asheron Management Consultancies in Dubai. Advisory across AI governance, strategy, capability, and project delivery.

- H1: Request a consultation.
- Sub: Tell us briefly what you are trying to deliver. We will respond within one business day.

Form fields

Field	Type	Required	Notes
Full name	text	Yes	

Field	Type	Required	Notes
Work email	email	Yes	Validate format; reject disposable domains
Phone	tel	No	International format, UAE default `+971`
Organisation	text	Yes	
Job title	text	No	
Country / Emirate	select	Yes	UAE emirates listed first, then other countries
Area of interest	multi-select	Yes	AI & Innovation, Strategy & Management, People & Capability, Project Development, Not sure yet
How can we help?	textarea	Yes	1,000-character limit with live counter
Consent	checkbox	Yes	See consent wording in §7
Marketing opt-in	checkbox	No	See wording in §7

Form behaviour

- Client-side and server-side validation; inline error messages beneath each field.
- Invisible anti-spam: honeypot field plus Cloudflare Turnstile or reCAPTCHA v3. No visible puzzle challenges.
- On success, redirect to `/contact/thank-you` (indexable: no) with copy: **Thank you — your enquiry has been received.** A member of the Asheron team will respond within one business day. For urgent matters, please email `[EMAIL]`.
- On failure, retain all entered values and display: We were unable to send your enquiry. Please try again, or email us directly at `[EMAIL]`.

Contact panel (beside form)

- Email: `[EMAIL]`
- Phone: `[PHONE]`
- Address: `[OFFICE ADDRESS]`, Dubai, United Arab Emirates
- LinkedIn: `[LINKEDIN URL]`
- Office hours: Monday to Friday, 09:00–18:00 (GST / UTC+4)
- Optional: embedded map — load only on user click (no third-party map script on initial page load).
- Optional: meeting-booking link `[BOOKING URL]`.

4.11 Error pages

- **404** — H1: This page could not be found. Body: The page may have moved or the link may be incorrect. Links: Home, What We Do, Contact.
- **500** — H1: Something went wrong. Body: Please try again shortly, or contact us at `[EMAIL]`.

5. Design Direction

5.1 Colour palette

Token	Hex	Use
`--navy-900`	`#0B1B2B`	Primary brand, dark sections, footer
`--navy-700`	`#14304A`	Secondary dark, hovers on dark
`--slate-500`	`#5A6B7C`	Body text on light, secondary text
`--slate-200`	`#DCE3EA`	Borders, dividers, muted fills
`--off-white`	`#F7F9FB`	Alternating section background
`--white`	`#FFFFFF`	Base background, cards
`--gold-500`	`#B08D3F`	Accent: rules, icon strokes, small emphasis
`--gold-300`	`#D9BE7E`	Accent on dark backgrounds only
`--success`	`#2E7D5B`	Form success
`--error`	`#B3261E`	Form errors

Colour rules

- Gold is an accent, never a background fill for large areas and never used for body text.
- Gold must not be the sole indicator of interactive state; pair with underline, weight, or elevation change.
- Body text on light backgrounds uses `--navy-900` at full strength; `--slate-500` only for secondary text.
- All text/background pairings must meet WCAG 2.2 AA (4.5:1 body, 3:1 for large text ≥24px). Verify gold-on-navy and slate-on-off-white combinations explicitly.

5.2 Typography

- **Headings:** a high-contrast serif or refined geometric sans. Recommended: *Fraunces*, *Newsreader*, or *Playfair Display* (serif option) — or *Inter Tight* / *Söhne* (sans option). Pick one and apply consistently.
- **Body:** *Inter* (or *Söhne*), 400/500/600 weights.
- Self-host fonts as WOFF2 with `font-display: swap`. Do not load fonts from Google's CDN (privacy and performance).

- Maximum two font families and four weights total.

Type scale (desktop → mobile)

Element	Size	Line height	Weight	Tracking
H1	56px → 34px	1.08	600	-0.02em
H2	38px → 26px	1.15	600	-0.015em
H3	24px → 20px	1.25	600	-0.01em
Body large (lead)	20px → 18px	1.6	400	0
Body	17px → 16px	1.65	400	0
Small / caption	14px	1.5	400	0
Licence / eyebrow label	12px	1.4	600	0.12em, uppercase

Body copy measure: 62–72 characters maximum.

5.3 Layout and spacing

- Max content width 1280px; text-heavy blocks capped at 760px.
- 12-column grid, 24px gutters desktop, 16px mobile; page margins 80px desktop / 24px mobile.
- Spacing scale (px): 4, 8, 12, 16, 24, 32, 48, 64, 96, 128. Section vertical padding: 128px desktop, 72px mobile.
- Breakpoints: 360, 480, 768, 1024, 1280, 1536.
- Corner radius: 4px (inputs, buttons), 8px (cards). No pill shapes except category chips.
- Shadows: minimal. `0 1px 2px rgba(11,27,43,.06)` at rest, `0 8px 24px rgba(11,27,43,.10)` on hover.

5.4 Components

- **Buttons** — Primary: navy fill, white text. Secondary: navy 1px outline, transparent fill. Tertiary: text link with gold underline on hover. Minimum touch target 44×44px. Focus state: 2px `--gold-500` outline with 2px offset, always visible.
- **Practice card** — eyebrow licence label, H3 title, body copy, bottom-aligned link, 3px top rule in gold that widens on hover.
- **Stat / credibility strip** — single row, dividers between items, collapses to a 2×2 grid on mobile.
- **Callout box** — off-white fill, 3px left gold rule, used for disclaimers and key points.
- **Approach timeline** — numbered horizontal steps with a connecting hairline; vertical on mobile.
- **CTA band** — full-bleed navy, centred heading and single button.

5.5 Imagery and iconography

Permitted

- Abstract representations of structure, data, and systems (line-based, geometric, low-saturation).
- Architectural photography of UAE built environment: clean lines, restrained, no landmark clichés overused.
- Authentic professional environment photography, only if commissioned or premium-licensed.
- Custom line icons (1.5px stroke, consistent 24px grid, gold or navy stroke).

Prohibited

- Handshakes, gavels, jigsaw pieces, chess pieces, arrows hitting targets, lightbulbs, robot hands, glowing brain graphics.
- AI-generated imagery of people.
- Generic blue-tinted "cyber" imagery, matrix code, binary streams.
- Flags, government emblems, regulator logos, or anything implying official endorsement.

Image specification: WebP/AVIF with JPEG fallback, `srcset` at 1x/2x, lazy loading below the fold, explicit width/height to prevent layout shift, descriptive alt text on every content image (decorative images `alt=""`).

5.6 Motion

- Purposeful only. Fade-and-rise on section entry (16px, 400ms, `cubic-bezier(.2,.6,.2,1)`), staggered by 60ms across cards.
- Hover transitions 150–200ms.
- No parallax, no auto-playing carousels, no counters that animate on every scroll.
- Respect `prefers-reduced-motion: reduce` — disable all transform and opacity animation.

5.7 Bilingual readiness

Arabic is not in phase 1 scope but must not be architected out.

- Use logical CSS properties (`margin-inline-start`, `padding-inline`, `inset-inline`) rather than left/right.
- Keep all copy in content files or a CMS, never hard-coded in components.
- Reserve a language toggle slot in the header.
- Test that the layout does not break under `dir="rtl"`.

6. Technical Requirements

6.1 Stack

Preferred: **Next.js (App Router) + TypeScript + Tailwind CSS**, statically generated where possible, deployed to Vercel or an equivalent edge platform. Alternative acceptable stacks: Astro + Tailwind, or a headless CMS with a static front end. WordPress is acceptable only if performance and security requirements below are met and a hardened, minimal-plugin build is used.

Content management: a headless CMS (Sanity, Contentful, or Payload) is required for Insights, and preferred for page copy so the client can edit without a deploy. Provide the client with editor access, a short written editing guide, and preview capability.

6.2 Performance budget

- Lighthouse mobile: Performance ≥ 90, Accessibility ≥ 95, Best Practices ≥ 95, SEO ≥ 95.
- Core Web Vitals at the 75th percentile: LCP ≤ 2.0s, INP ≤ 200ms, CLS ≤ 0.05.
- Total transferred bytes for the home page ≤ 1.2MB, JavaScript ≤ 180KB gzipped.
- Hero image ≤ 200KB. No render-blocking third-party scripts.
- CDN with edge caching; Brotli compression; HTTP/2 or HTTP/3.

6.3 Accessibility — WCAG 2.2 Level AA

- Semantic landmarks (`header`, `nav`, `main`, `footer`), one H1 per page, logical heading order.
- Full keyboard operability including the mobile menu and dropdown; visible focus states everywhere; skip-to-content link.
- Form inputs with programmatically associated labels, `aria-describedby` for hints, `aria-live` region for submission status and error summaries.
- Colour contrast verified for every text and UI pairing; never convey information by colour alone.
- Tested with screen reader (NVDA or VoiceOver) and with 200% zoom / 320px viewport reflow.
- Deliver a short accessibility conformance summary at handover.

6.4 SEO

- Unique title (≤60 chars) and meta description (≤155 chars) per page, as specified in §4.
- Clean lowercase hyphenated URLs; no trailing-slash inconsistency; 301 redirects for any changed path.
- Canonical tags on all pages; `noindex` on thank-you pages and any internal utility pages.
- Open Graph and Twitter card tags with a 1200×630 OG image per page type.

- `sitemap.xml` auto-generated and submitted; `robots.txt` allowing crawl of production and blocking staging.
- Structured data (JSON-LD): `Organization` and `ProfessionalService` on Home, `Service` on each practice page, `BreadcrumbList` sitewide, `Article` on insight posts, `FAQPage` only where visible FAQ content exists.
- `Organization` schema must include legal name, Dubai/AE address, contact point, and LinkedIn `sameAs`.
- Staging environment protected by HTTP auth and `noindex` to prevent duplicate indexing.

6.5 Forms, email, and integrations

- Server-side form handling; no third-party form embed that exposes submissions to an unapproved processor.
- Enquiries delivered to `[ENQUIRY MAILBOX]` with a copy stored in the CMS or database for 24 months.
- Automated acknowledgement email to the enquirer, sent from a verified domain address.
- Rate limiting (e.g. 5 submissions per IP per hour) and input sanitisation against injection.
- Email deliverability: configure SPF, DKIM, and DMARC for the sending domain before launch.
- Analytics: privacy-respecting by default (Plausible, Fathom, or GA4 with IP anonymisation and consent gating). Track: consultation CTA clicks, form starts, form submissions, insight reads, practice-page depth.
- Optional CRM/newsletter integration only after a data-processing review by the client.

6.6 Security

- HTTPS enforced with HSTS (`max-age=31536000; includeSubDomains; preload`).
- Security headers: `Content-Security-Policy` (no `unsafe-inline` in scripts), `X-Content-Type-Options: nosniff`, `Referrer-Policy: strict-origin-when-cross-origin`, `X-Frame-Options: DENY`, `Permissions-Policy` denying camera, microphone, and geolocation.
- No secrets in the client bundle or repository; environment variables via the host's secret store.
- Dependency scanning in CI; patch high/critical vulnerabilities before launch.
- Admin/CMS access with MFA enforced and named accounts only.
- Automated daily backups with a documented restore procedure.
- No third-party script may be added post-launch without client approval.

6.7 Browser and device support

Latest two versions of Chrome, Safari, Edge, and Firefox on desktop; Safari iOS 16+ and Chrome Android (latest two). Test at 360px, 390px, 768px, 1024px, 1440px, and 1920px widths. Graceful degradation, not pixel parity, on older browsers.

6.8 Delivery and handover

Environments: local → staging (password-protected) → production. Deploy previews on every pull request.

Handover package must include:

1. Source repository with README covering setup, build, deploy, and environment variables.
2. CMS access, roles, and a 2–3 page editing guide (adding an insight, editing page copy, updating contact details).
3. Design files (Figma) with published components and design tokens.
4. Lighthouse and accessibility reports for Home, a practice page, Insights, and Contact.
5. Analytics access, verified Google Search Console property, and submitted sitemap.
6. Domain, DNS, SSL, and email authentication records documented.
7. 30-day post-launch defect-fix period and a documented support/SLA arrangement thereafter.

Suggested phasing: discovery and design sign-off → build → content population → QA and accessibility audit → client UAT → launch → 30-day support.

7. Compliance, Legal, and Content Governance

These requirements are mandatory and must be met before the site goes live.

7.1 Copy governance rules for developers

Do not write, generate, or paraphrase new regulatory, legal, or service claims. Use only the copy in §4. If content is missing, flag it as a placeholder rather than filling the gap.

Prohibited claims anywhere on the site

- Guarantees of regulatory approval, licensing, no-action outcomes, or compliance status.
- "Regulator-approved", "regulator-endorsed", "certified by [authority]" unless the client supplies written evidence.
- Claims of "fully autonomous" compliance, decision-making, or monitoring.
- Client names, logos, testimonials, engagement details, case-study outcomes, or supervisory interactions — unless the client provides written consent evidence.
- Statistics, market figures, or "X% of clients" claims without a cited, verifiable source.
- Use of any regulator's name or emblem in a way implying affiliation or endorsement.

Required standing disclaimer (footer, small text on every page)

> Asheron Management Consultancies, LLC provides management, strategy, capability, project, and innovation advisory services. Content on this website is general information only and does not constitute legal, regulatory, audit, tax, or investment advice. No advisory relationship is created by use of this website.

Required licence display (footer): `Licensed activities: 7020039 · 7020003 · 7020008 · 7020020`. Full trade licence number and registered address on the About and Contact pages once supplied.

7.2 Privacy Notice — `/privacy`

Client's legal reviewer must approve final wording. The notice must cover, at minimum:

- Identity and contact details of the controller (Asheron Management Consultancies, LLC, Dubai, UAE) and the contact point for privacy queries.
- Categories of personal data collected (identity, contact, organisation, enquiry content, technical/usage data, cookie data).
- Purposes and legal basis for each processing activity (responding to enquiries, service delivery, marketing with consent, security, analytics).
- Recipients and processors (hosting, CMS, email, analytics, anti-spam provider) — name each one actually used in the build.
- Cross-border transfers, where processors are located outside the UAE, and the safeguards applied.
- Retention periods (enquiry records: 24 months unless a client relationship begins).
- Data-subject rights available under UAE Federal Decree-Law No. 45 of 2021 on the Protection of Personal Data, including access, correction, erasure, restriction, objection, portability, and withdrawal of consent, and how to exercise them.
- Complaint route and response timeframe.
- Security measures summary and breach-notification commitment.
- Version and last-updated date.

Developers must supply the client with a written list of every third-party service that processes visitor data so the notice is accurate.

7.3 Cookie Notice — `/cookies` and consent banner

- Categorise cookies: strictly necessary, functional, analytics, marketing.
- No non-essential cookie, analytics script, embedded map, video, or social pixel may load before explicit consent.
- Banner must offer Accept all, Reject all, and Manage preferences with equal prominence; rejection must be as easy as acceptance.

- Consent must be recorded with timestamp and be withdrawable at any time via a persistent footer link ("Cookie preferences").
- Maintain a cookie table listing name, provider, purpose, type, and duration; update it whenever a script changes.

7.4 Consent wording (contact form)

Required checkbox (unticked by default):

> I consent to Asheron Management Consultancies, LLC collecting and processing the personal data I have provided in order to respond to my enquiry, in accordance with the Privacy Notice.

Optional checkbox (unticked by default):

> I would like to receive occasional insights and updates from Asheron. I understand I can withdraw this consent at any time.

Neither box may be pre-ticked, and the marketing box must not be a condition of submitting the form. Store the consent text version and timestamp with each submission.

7.5 Terms of Use — `/terms`

Must address: permitted use of the site, intellectual property ownership, no-advisory-relationship statement, no-warranty and limitation-of-liability provisions, third-party links disclaimer, governing law (United Arab Emirates, Emirate of Dubai) and jurisdiction, and amendment rights. Client's legal reviewer approves final wording.

7.6 Accessibility and confidentiality statements

- Publish a short accessibility statement (target WCAG 2.2 AA, known limitations, contact route for accessibility issues).
- Contact page must include a discretion note: **Please do not submit confidential, privileged, or client-identifying information through this form. We will arrange a secure channel where needed.**

7.7 Pre-launch approval checklist

#	Item	Owner
1	All [PLACEHOLDER] values replaced with verified client information	Client
2	Licence numbers, trade licence, and registered address verified	Client
3	No prohibited claims present (full-site copy review)	Client
4	Privacy Notice, Cookie Notice, Terms of Use legally reviewed and published	Client legal
5	Consent flows tested; no non-essential script fires before consent	Developer
6	Third-party processor list delivered to client	Developer

#	Item	Owner
7	Form delivery, acknowledgement email, SPF/DKIM/DMARC verified	Developer
8	Lighthouse and WCAG 2.2 AA audits passed and reports delivered	Developer
9	Staging de-indexed; production sitemap submitted to Search Console	Developer
10	Security headers, HSTS, and backups verified	Developer
11	Analytics events firing correctly for CTA and form conversions	Developer
12	Leadership profile, photograph, and first three insights published	Client

8. Placeholder Register

The following must be supplied by the client before launch. Developers should build with visible placeholder markers, not invented values.

Placeholder	Description
`[EMAIL]`	Primary enquiry email address
`[ENQUIRY MAILBOX]`	Destination mailbox for form submissions
`[PHONE]`	Business telephone number
`[OFFICE ADDRESS]` / `[REGISTERED ADDRESS]`	Dubai office and registered addresses
`[TRADE LICENCE NUMBER]`	Trade licence number
`[LINKEDIN URL]`	Company LinkedIn page
`[BOOKING URL]`	Meeting-scheduling link (optional)
`[LEADERSHIP NAME]` / `[TITLE]` / `[BIOGRAPHY]` / `[PHOTOGRAPH]`	Leadership profile assets
Brand assets	Logo (SVG, light and dark variants), favicon set, OG images
Insights	First three articles with images and author attribution

End of specification. Direct all clarification requests to the client's project owner before making assumptions about copy, claims, or licensing content.
